In his work as a tutor and researcher, the candidate gradually focused on elections and electoral systems as his professional field. The results of Zhivkov's scientific research quickly find realization as publications and are implemented in the courses he teaches. His academic activity is consistent, systematic and well timed, currently demonstrating full academic maturity for habilitation. The monograph presented as a main habilitation thesis and the complete work of St. Zhivkov demonstrates the possession of the analytical, research and pedagogical abilities necessary for a Bulgarian associate professor, whose findings and discoveries will gradually gain international popularity and citations.

The documents and materials presented by Dr. Svetoslav Zhivkov meet all the requirements of the Law on the Development of the Academic Staff in the Republic of Bulgaria, the regulations for its implementation and the relevant regulations of SU "St. Kliment Ohridski". In the open call, the candidate has submitted enough scientific works published after the acquisition of his PhD degree and his participation in a competition for the academic position of "chief assistant professor" at SU "St. Kliment Ohridski". The candidate's works contain original scientific and applied contributions that have received international recognition. His theoretical developments have practical applicability, and some of them are directly oriented to the educational process and the development of new courses. I have not exposed any plagiarism in any of the submitted works. Dr. Zhivkov's scientific and teaching qualifications are undoubted, and his media activity makes an impression. The results achieved by Svetoslav Zhivkov in the educational and scientific research activities fully correspond to the specific requirements of the Sofia University in connection with the application of the national legislation.

After getting acquainted with the materials and scientific works presented in the open call, analyzing their scientific significance and applications, I find it reasonable to give my
